

Using RUReadyND.com with Safari

Having trouble getting from the Professional Center to the student side “shadow account” when using the Safari browser?

When you click on the **RUReadyND.com logo/Go to RU Ready ND** text in the Professional Center, you should be taken directly to the student side “shadow account.” If nothing happens when you do so, check to see if you have blocked pop-up windows in your Safari browser.

The method for checking may vary by the version of Safari you are using. In the most current version, Safari 5.1, click on the “gear” in the upper right hand corner and make sure that “Block Pop-Up Windows” is not checked.

You should now be able to access the student side “shadow” account.
